

HISTOPATHOLOGY / CYTOPATHOLOGY
REPORT FORM

PATH.NO
EP/1077/20

HOSP. NO

SURNAME: FRIMPONG M. OTHER NAMES: BAFFOUR REQUESTING DR / SURGEON DR. ADINKU

SEX: M AGE: 54 YRS SPECIMEN DATE: 16/05/2020 HOS/WARD: SOYUZ THERAPY: CHEMO/HORMONES: NIL RADIATION: NIL CONTRACEPTIVES: NIL

NATURE OF OPERATION: UPPER GI ENDOSCOPY

SOURCE OF SPECIMEN (TISSUE / ORGAN SITE) E.G. ENDOMETRIUM ETC
GASTRIC TUMOUR

L.M.P.: NO. OF BIOPSIES: 6 PREVIOUS CYTO / HISTO NO: NIL

TYPE OF FIXATIVE: 10% FORMALIN

CLINICAL SUMMARY:
PRESENTS WITH UPPER GI BLEEDING.
CLINICAL DIAGNOSIS:

PROBLEM TO BE RESOLVED:

DIAGNOSIS:

Gastric biopsies: Invasive poorly differentiated adenocarcinoma.

COMMENT:

Please request HER2/neu analysis if clinically relevant.

MICRO:

Microscopy show sections from pieces of gastric mucosal tissue. There are fragments with solid sheets and focal glandular formations of atypical epithelial cells. The cells have hyperchromatic and pleomorphic nuclei. There are atypical mitosis. The stroma shows chronic inflammation. The histology is that of infiltrative adenocarcinoma, intestinal type.

MACRO:

Received 5 pieces of gray white biopsies measuring 0.5x0.5x0.2cm in aggregate.
All embedded. 1 cassette taken.

Grossing done by AOD/SAM on 30/05/2020.
